

# ISMEG 2019

## 2nd International Symposium on Marine Engineering Geology

### Second Announcement

Dalian, China  
18-20 October 2019

<http://ismeg2019.dlut.edu.cn>

## Host Organizations

- ◆ IAEG Commission 34
- ◆ State Key Laboratory of Coastal and Offshore Engineering (SLCOE), Dalian University of Technology

## Cooperating Organizations

- National Natural Science Foundation of China
- Ocean University of China
- Hohai University
- Zhejiang University
- Tongji University
- The University of Western Australia
- Norwegian Geotechnical Institute
- Tianjin University
- Dalian University
- The First Institute of Oceanography, MNR
- China National Offshore Oil Corporation
- China General Nuclear Power Corporation
- Guangzhou Marine Geological Survey

The ocean is the cradle of life, and rich in natural resources. With the worldwide boom in exploration and application of ocean resources, a dramatically increasing amount of coastal and offshore engineering facilities have been designed and constructed. The rapid development of human economic activities and global climate change have been leading to a big impact on the marine environment, resulting in frequent geological disasters. Under this circumstance, there is an urgent need to have a platform on which the scientists and engineers can show and share their state-of-art research in the field of Marine Engineering Geology. The 2<sup>nd</sup> International Symposium of Marine Engineering Geology (ISMEG 2019) will be held in Dalian, China between 18 and 20 October 2019. The theme of this symposium is "Exploration of Marine Resources and Marine Engineering Geology". It will provide opportunities for participants worldwide to discuss their recent advances, to share their knowledge and to identify future research directions in Marine Engineering Geology.

Welcome to Dalian in 2019!

YANG Qing

IAEG Commission 34

## Topics

- Engineering Properties of Marine Soils
- Marine Geological Hazards and Preventions
- In-situ Exploration, Monitoring and Physical Modelling
- Hydrodynamics and Environmental Interaction
- Exploration of Gas Hydrate
- Offshore Foundations
- Flow-Structure-Seabed Interaction

## Program

Technical sessions will run over two days consisting of plenary and keynote speeches, delegate oral and poster presentations.

## Call for Abstracts and Publication

Abstracts should be submitted to email address: [ismeg2019@163.com](mailto:ismeg2019@163.com) or conference website: <http://ismeg2019.dlut.edu.cn>

Those excellent papers will be collected and considered to be published as a fully peer-refereed special issue of **ICE-Environmental Geotechnics** and **Journal of Marine Science and Engineering** for consideration of publication.

## Important Dates

<b>Abstract Submission Deadline</b>	<b>31 May 2019</b>
<b>Early Registration Deadline</b>	<b>31 Aug 2019</b>
<b>Conference Dates (Check-in)</b>	<b>18 Oct 2019</b>
<b>Conference Dates (Technical sessions)</b>	<b>19-20 Oct 2019</b>
